The Story of Stone

For millions of years, stone has shaped the face of our planet. Formed by the earth's deepest forces and sculpted by wind, water, and time, it stands as a silent witness to nature's grand design. Long before civilizations rose, stone carried the stories of shifting continents and ancient oceans. And when humankind arrived, it became our first shelter, our first tool, and eventually, the foundation of culture itself. From the pyramids of Egypt to the temples of Greece, from the cobbled streets of Europe to the great fortresses of Asia, stone has been at the heart of how we built, celebrated, and endured.

As centuries passed, we began to ask more of our materials. Cities grew taller, spaces became lighter, and architecture demanded not only strength but also efficiency, adaptability, and sustainability. Out of this evolution came reconstructed stone—a material born of innovation, designed to honor the timeless beauty of quarried stone while meeting the needs of the modern world. What began as simple imitation has advanced into a remarkable achievement of design and technology.

Today, reconstructed stone offers architects and designers freedom once unimaginable: a vast array of tones and textures, compatibility with insulation systems, seamless corner solutions, and a lightweight form that allows stone's presence in places where natural extraction would be impossible. At the forefront of this transformation is Mathios Stone. As one of the early pioneers in this field, we have dedicated decades to perfecting the craft—combining artistry and technical precision to create collections that feel as authentic as they are advanced.

At Mathios Stone, we do not see our work as replacing nature, but as celebrating it. We take what the earth has taught us and carry it forward—creating materials that are robust yet refined, sustainable yet luxurious, and adaptable to the visions of architects and homeowners alike. In this way, stone's story continues—not as something ancient and immovable, but as a living, evolving element in the architecture of tomorrow.

S Slim Stone (Thickness less than or equal to 30 mm)

Mathios Company History

- **135+ years** of experience
- **5 generations** family company
- **25 years** in the Athens Stock Exchange
- **2 production plants** in europe
- **4 logistics** centers
- **50+ countries** exports network

Over 135 years of history

1890 Founding of the “Mathios Company”. Dimitris Mathios establishes a personal company with the scope of constructing & repairing refractory projects (furnaces, smoke stacks etc.).

1955 The personal company switches to I. Mathios Bros. LTD active in the industrial refractory construction and the production & trade of refractory materials, contributing to the industrialization of Greece.

1985 The Company converts to Mathios S.A. The present BoD takes over.

1990 It begins the production of handmade stone cladding and starts exporting.

2002 Mathios GmbH & Mathios AD subsidiaries establishment

2000 IPO in Athens Stock Exchange. Fully automated production plant for architectural stone in Athens, Greece.

2005 Ideal Refractories company acquisition

2011 Stone production plant in Bulgaria inauguration

2019 Sustainability embedded in the core of our strategy & culture.

2022 Adopting principles of the circular economy in the Refractories production.

2024 Environmental friendly stone casting using recyclable molds which minimize waste and ecological footprint.

Environmentally Friendly

Mathios Stone, since its creation, has been dedicated to preserving this world for generations to come. As a leading global producer of architectural stone veneers, we are therefore fully committed towards developing environmentally conscious products.

A NEW, SUSTAINABLE STONE

Mathios Stone is lightweight (up to 2 times lighter than quarry stone) due to the advanced, technological materials used.

The lightweight nature of Mathios Stone allows for greater flexibility and versatility in design. It can contribute to a reduced structural load on buildings and infrastructure.

THE MATHIOS STONE SYSTEM

Mathios Stone, can be applied on any surface including thermal insulation systems contributing to the overall energy efficiency of structures.

Finally, Mathios Stone has three times lower heat capacity than extracted stone. During the summer, it does not absorb heat and helps maintain a cooler surface, reducing the impact of external heat. In contrast, during the winter, it acts as an insulator retaining heat within a space and lowering the need for additional heating.

MINIMIZING WASTE

Mathios stones come in precut pieces ready to use, ensuring that they fit together seamlessly for a higher aesthetical result. They eliminate the need for on-site cutting and shaping, saving time during the construction process, and reducing labor costs. There is also minimal to no waste generated during the construction process in alliance with sustainable construction practices.

WE INTERRUPT AN OUTDATED HABBIT

While quarry stone is a natural and durable material, the extraction process can have severe, negative environmental impacts. Although some quarrying operations adhere to local regulations, most quarries around the world use unregulated, dangerous and polluting methods such as blasting and end up in abandoned open quarry pits, once the available stone is finished.

The ecosystems are then forever destroyed and scenic quality of the area is severly negatively impacted.

In contrast, all of the raw material aggregates used in Mathios Stones come from zero-blasting, rehabilitated quarries.

FOCUS ON RECYCLING & RECYCLED RESOURCES

We give priority to using materials with a good recyclability and make sure that the products we develop maintain their value throughout their whole lifecycle and use recycled materials where possible.

All packaging is made of recycled paper and is 100% recyclable. That reflects our promise to responsible environmental stewardship, efficient resource utilization, and the advancement of circular economy principles.

AIR QUALITY, HUMAN HEALTH & ENVIRONMENTAL SUSTAINABILITY

Mathios Stone products do not contain substances harmful to human health and the environment. Being Certified A+ for VOC emissions signifies that Mathios Stone has undergone testing and has demonstrated very low emissions of volatile organic compounds, which are known to contribute to indoor or outdoor air pollution and health problems.

DESIGNED WITH PEOPLE & THE ENVIRONMENT IN MIND

We understand very well that developing new stone products should be done responsibly. This is why every new product we design is assessed not only from aesthetic but also from an environmental point of view, taking into consideration not only the material it is made of but most importantly its life-cycle and recycling options. Developing a truly sustainable product however encompasses a lot more than just using eco-materials to produce it.

All our stone products are designed in such a way that they are resource efficient, have an enhanced life-cycle and a 100% recyclability.

SENSIBLE PRODUCTION & INTELLIGENT LOGISTICS

Resourceful manufacturing is only half the way. Aiming to minimize our carbon footprint, we continuously invest in using renewable energy for our manufacturing facilities.

We also prioritize optimized palletization to reduce transportation impacts reflecting our mission for efficiency and sustainability in our logistics and supply chain operations.

RESPONSIBLE DEVELOPING, PRODUCING & RESOURCE MANAGEMENT

Because how we produce our products has a direct impact on the environment, we are truly devoted towards making ongoing improvements to our production processes and logistics.

To make sure our commitments towards becoming more sustainable are met, we also expect all our suppliers to join us in this journey and make sure that all materials we use are sourced, processed, and produced in an ethical and environmentally friendly way.

The materials we use come from companies that are strictly committed to effective management and rehabilitation of quarries as well as sustainability.

The aggregates we apply are sediments and natural accumulations. Unlike materials extracted from quarries, sediments and natural accumulations can be considered a renewable resource because are constantly replenished through natural processes like erosion and weathering involving less habitat disruption and ecosystem alteration.

BEYOND A STANDARD DEVELOPMENT TEAM

We, at Mathios Company, have formed an interdisciplinary team to fulfill our commitment to delivering environmentally conscious products through sustainable production. Designers, engineers, sustainability experts and product developers bring diverse expertise to the table, ensuring that sustainability considerations are embedded in various aspects of the product development process.

To further drive innovation and excellence, we partner with academic institutions, leveraging their research capabilities, novel ideas and fresh perspectives.

Mathios Stone
Artisanal

Bridging Tradition with Sustainable Architecture.

Architecture, at its essence, is about connection between materials and environments, between tradition and innovation, and ultimately between past, present, and future. Just as ancient Greek stone bridges represent architectural ingenuity and craftsmanship passed down through generations, the Mathios Stone Artisanal Collection stands as a contemporary bridge, linking traditional masonry artistry to today's sustainable architectural practices.

Each piece within this distinctive collection encapsulates the genuine textures and refined aesthetics of historic European and Greek masonry. At a moment when the heritage of traditional artisanal stonework is under threat of disappearing, Mathios Stone carefully preserves this irreplaceable legacy. Through meticulous craftsmanship and detailed reproduction of authentic patterns, these stones embody the character and depth of historic architecture, keeping alive the delicate art of hand-shaped stone textures and traditional masonry techniques.

Yet, preserving tradition does not mean standing still. Mathios Stone integrates the authenticity and beauty of artisanal designs seamlessly into modern building methods. Manufactured sustainably from natural materials, our collection meets the practical demands of contemporary architecture, providing ease of installation, durability, and exceptional design flexibility.

Choosing Mathios Stone's Artisanal Collection means actively bridging the craftsmanship of yesterday with the innovative, sustainable vision of tomorrow. It is an architectural statement of respect toward heritage, an investment in quality and authenticity, and an expression of timeless beauty reshaped for modern life.

Dion

Dion stone captures the timeless strength of natural stone through a refined contemporary aesthetic. Its pronounced, textured surface and carefully designed pattern create surfaces with depth, character, and authenticity. The stone originates from the village of Dion in Northern Greece, a region known for its rich geological heritage, adding authenticity to every application. Every element of its composition highlights the raw, natural appearance of stone, delivering a result that balances robustness with elegance.
The design of Dion is defined by balanced geometries and natural irregularities, giving each application a unique identity, whether used in interior or exterior spaces. Its rich texture creates striking plays of light and shadow, enhancing the dynamic presence of the surface.
Available in selected color shades Champagne, Gray, Ivory, Taupe and Volcanic, Dion offers exceptional design flexibility and integrates harmoniously into any architectural style — from modern and minimal to traditional and rustic.

Orvilos

The epitome of rustic stone. Orvilos is a stone that originates from the mountains of Chalkidiki in Greece. Similar stones can be found throughout the region, either used as drystack or combined with grout. Orvilos captures the essence of nature's rugged beauty with its weathered, aged, or rough-hewn appearance. Its irregular shapes, textured surfaces, and earthy tones evoke a profound sense of authenticity, warmth and charm. Whether adorning exterior facades, accentuating interior spaces, or enhancing landscaping features, Orvilos by Mathios Stone infuses environments with a distinct character and a connection to the natural world, creating spaces that feel both cozy and captivating.

Arcadian

Arcadian is a hymn to rustic beauty. Random stones of various sizes and earthy tones bring a little taste of the serenity and beauty of the Mediterranean region. Create a unique provincial style façade or eye catching exterior walls. Alternatively combine it with industrial elements and create dynamic interiors with interesting contrast.

Cervino S

Inspired by the refined masonry of French suburban architecture, Cervino reinterprets traditional stonework for contemporary spaces. Its arrangement of different-sized stones creates a balanced yet dynamic composition, with textures and tones that bring subtle depth and movement to walls. This thoughtful design allows Cervino to transition effortlessly between indoor and outdoor applications, making it ideal for cohesive architectural concepts. Available in two distinctive colors, Cervino offers designers contrasting aesthetics to suit their vision. Ivory combines warm, earthy hues that evoke a rustic, inviting charm—perfect for residential facades and interiors seeking natural warmth. White, in contrast, emphasizes purity and precision with its luminous surface, lending sophistication and a sense of lightness to modern designs.

Tuscany

Mathios Stone Tuscany captures the essence of rustic architecture with its irregular forms and lightly chiseled texture, reminiscent of hand-laid stone walls found across the Tuscan countryside. Inspired by the timeless beauty of Italy's most beloved region, Tuscany balances organic shapes with a sense of structure, creating surfaces that feel warm, authentic, and inviting. It brings together the irregular forms and textured surfaces typical of Tuscan masonry, reinterpreted for contemporary architecture. Its combination of large, blocky pieces and smaller inserts creates a balanced yet dynamic layout that works equally well in structured designs or more organic, freeform applications. The soft edges and hand-chiseled relief catch light in a subtle way, adding depth without overpowering the architectural composition.

Weather Conditions

Applicable on Internal & External spaces
Resistant to: Extreme temperatures from -30 to +60 degrees Celsius, Frost, UV, Different humidity levels, Water.

Ekali

Irregular but sophisticated. Mathios Stone Ekali reflects the beauty of a sunlit countryside and the nobility of the past. Its asymmetrical arrangement of stones creates a natural, handcrafted appearance, while the three light earthy tones allow it to harmonize effortlessly with diverse material palettes. Ekali is particularly suited to suburban homes, vacation retreats, and châteaux-inspired designs, where it evokes a sense of permanence and understated elegance. In modern contexts, it can be paired with smoother surfaces or minimalist lines to create an intriguing interplay of rough and polished elements. This collection also integrates beautifully with other Mathios Stone designs, allowing architects to compose layered, multidimensional walls that feel both curated and organic.

Altaia

Altaia masterfully balances rugged, natural textures with a structured rectangular layout, creating walls that feel both organic and meticulously designed. Its irregularly shaped pieces are arranged within a precise framework, producing a distinctive surface that brings depth and sophistication to any project. One of Altaia's defining features is its beautifully crafted corners, which create seamless transitions and have made it a signature choice among renowned architects. Frequently specified for large-scale projects worldwide, Altaia's popularity is led by its deep, moody Lava color—yet the collection also offers three additional colors. Altaia blends effortlessly with modern materials such as glass, steel, aluminium, and wood, enabling bold contrasts and layered compositions in both luxury exteriors and refined interior spaces.

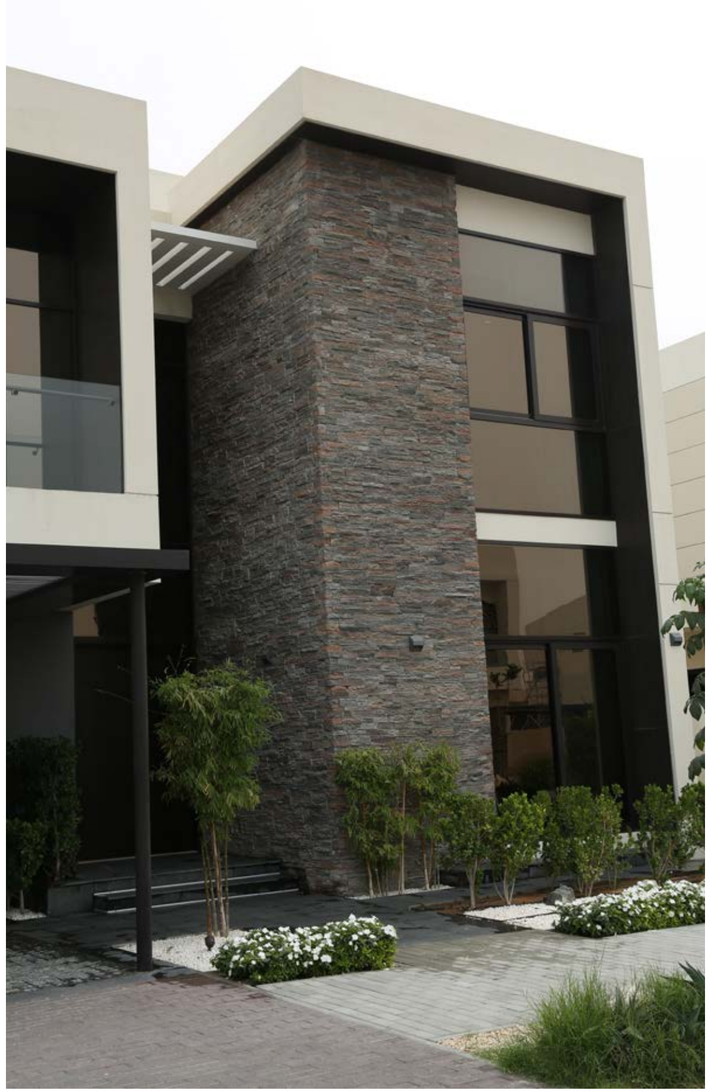
TELEPHONE



Alverstone

Alverstone is composed of innovative z-shaped pieces that interlock seamlessly, allowing for effortless coverage of both internal and external corners without the need for additional corner pieces.
This revolutionary design not only ensures a flawless, continuous appearance but also significantly reduces installation time and complexity. Its clean, interlocking geometry lends itself perfectly to contemporary architectural projects where precision and elegance
are key. With its subtle yet dynamic surface, Alverstone introduces depth and rhythm to facades, making it ideal for both exterior cladding and sophisticated interior accents. Architects favor it for its ability to deliver a refined, continuous stone finish that enhances modern minimalist spaces.

Mont Blanc

Mont Blanc is an emblematic and vigorous stone that radiates timeless strength and character. Each piece is meticulously handcrafted to capture and reflect natural sunlight, creating a captivating interplay of light and shadow that transforms walls into living, breathing surfaces. Its robust yet refined texture makes it a standout choice for exterior facades, infusing buildings with boldness and grandeur. Indoors, Mont Blanc brings a sense of architectural drama, perfect for accentuating spaces with a strong, sophisticated personality. With its versatility and striking visual depth, Mont Blanc is ideal for projects that demand both beauty and enduring performance.

Terra

Coarse and rugged, Terra is a stone that embraces raw, natural beauty with its irregular, textured pieces. This distinctive design captures the essence of untouched landscapes. Its coarse, irregular pieces create a sense of natural spontaneity, ideal for designs seeking an organic, unrefined aesthetic. It's a designer's choice for spaces that demand an authentic connection to the natural world. Terra can be also combined with other Mathios Stone collections to craft striking, one-of-a kind design blends. Its robust texture and dynamic surface interplay beautifully with natural light, adding depth and visual interest to any architectural setting. Designed for those who seek to evoke the charm of nature's untamed elegance, Terra transforms spaces into striking, timeless statements.

Rio Grande

Mathios Stone Rio Grande is a river rock patchwork, composed of water-worn pebbles that bring the calming essence of flowing streams into architectural design. Each element is carefully selected and replicated to reflect nature's tranquility and rustic elegance, making it ideal for spaces seeking organic softness and natural harmony. Rio Grande can also be elegantly combined with other Mathios Stone collections, allowing architects and designers to create compositions that blend textures and tones seamlessly.

Aragon S

The Aragon series is crafted with precision to elevate both exterior and interior walls, offering a seamless interplay of form and texture. Its clean lines and balanced proportions allow for effortless integration with grouted joints, creating refined surfaces that feel both contemporary and timeless. Available in four subtle, earthy tones, Aragon lends itself beautifully to modern architectural concepts as well as more traditional applications. The stone's gently chiseled face adds a tactile dimension, softening its linear structure while maintaining architectural clarity. This balance allows Aragon to complement a wide spectrum of materials—from concrete and glass to wood and metal—making it a go-to element in mixed-material compositions.

Alamo S

Alamo is defined by its elongated, rectangular forms and softly textured surface that captures the essence of hand-cut masonry. Its restrained geometry creates a rhythmic, linear aesthetic, ideal for contemporary facades seeking a sense of balance and proportion. The subtle champagne and gray tones are designed to reflect natural light gently, bringing warmth and sophistication to large exterior surfaces and adding refined texture to minimalist interiors. With its ability to convey both modern precision and timeless solidity, Alamo is perfectly suited for urban architecture, boutique hospitality projects, and residential designs where understated elegance is key. Mathios Stone Alamo has been chosen to adorn some of the most iconic projects worldwide, making it a preferred choice for designers seeking timeless beauty and versatility in their creations.

Vermont S

Simple yet sophisticated, Vermont by Mathios Stone is designed for spaces that demand quiet elegance and natural warmth. Its refined, linear composition creates a sense of calm and order, while the subtle variations in texture and tone evoke the organic beauty of hand-laid masonry. Vermont's clean lines and understated surface make it a versatile choice for both contemporary and transitional architecture, offering designers the freedom to create facades and interiors that are timeless yet modern. Whether applied to expansive exterior walls or intimate interior spaces, Vermont introduces a gentle interplay of light and shadow, adding depth without overwhelming the architectural form. It is ideal for projects where minimalism meets warmth—balancing sleek modernity with the inviting character of natural stone.

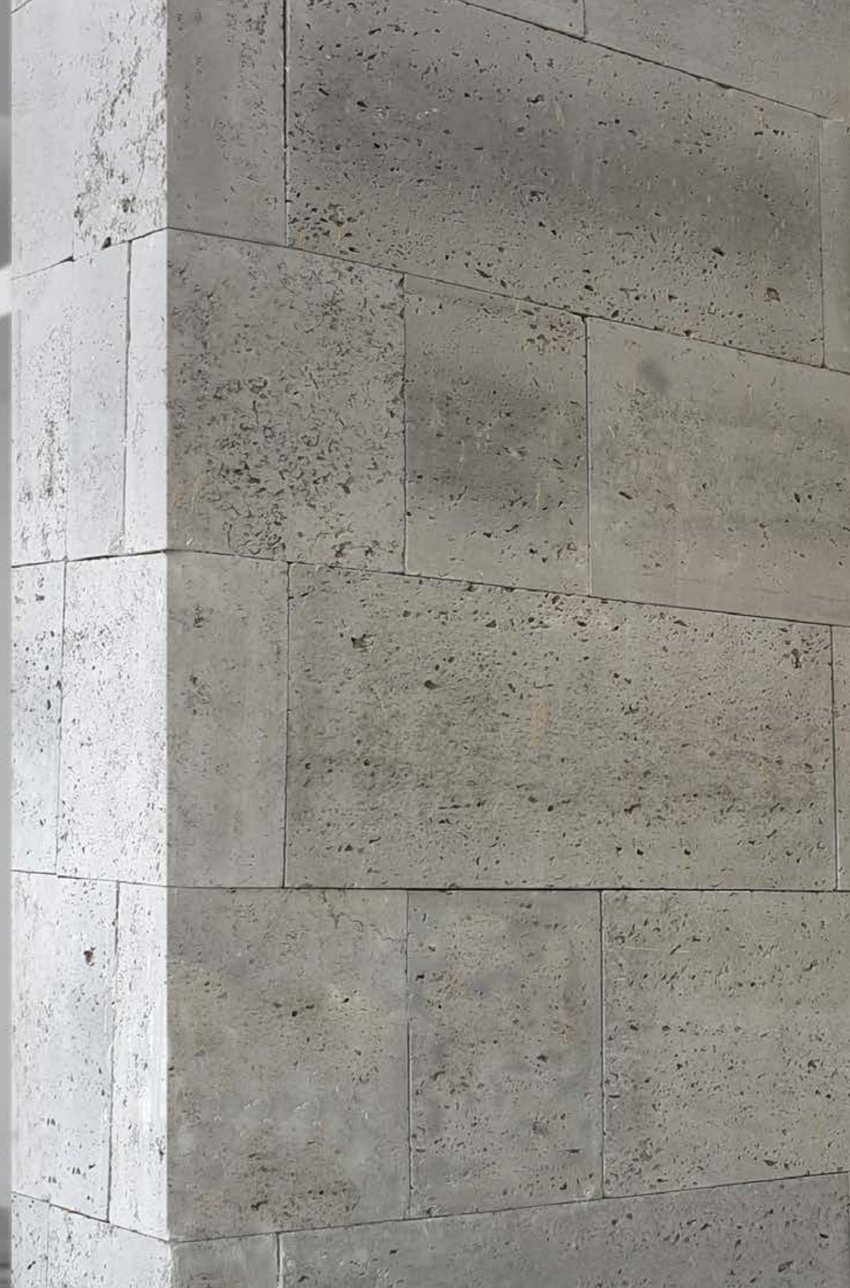
Mathios Stone
Contemporary

Mathios Stone Contemporary Collection exemplifies a commitment to simplicity, innovation, and functionality, all while integrating naturally inspired elements. Neutral colors such as white, gray, beige, and black create a sense of calmness and sophistication. Combining different stone types, colors, or finishes can create striking visual contrasts that add depth and interest to a space, while maintaining balance in the design.

Mathios Stone Contemporary line integrates seamlessly with other materials such as glass, metal, or wood. This interplay of materials enhances the overall aesthetic and allows for creative expression. This blend of modernity and natural beauty ensures that your designs resonate with a wide range of tastes and preferences, offering versatility and enduring elegance to your projects.



Tivoli S

Tivoli has been inspired by the famous travertine stone, largely selected by Italian sculptors like Bernini and Michelangelo and used for Roman monuments, aqueducts and amphitheaters like the legendary Colosseum. Mathios Stone Tivoli preserves this iconic texture while offering the flexibility of architectural stone, making it ideal for both contemporary and classical designs. Its linear veining and soft surface relief introduce subtle movement to facades, reflecting light in a way that enhances depth and dimension. Perfect for wall cladding and exterior applications, Tivoli pairs beautifully with modern materials such as glass, steel, and wood, allowing architects to create refined contrasts and harmonious compositions. In interiors, it adds a layer of sophistication to feature walls, delivering a timeless elegance suited to residential and commercial spaces alike.

Veracruz S

Sea-worn coral fossils sculpt Mathios Stone Veracruz, creating an exceptional surface texture that evokes the serene beauty of coastal landscapes. Inspired by fossil-rich shellstones, also known as Coquina, found in South America's coastal regions, Veracruz celebrates the natural imprints of time—fossil marks that tell a story of geological history. This unique texture makes it particularly suited for architectural concepts where designers seek to merge organic elements with modern structures. The fossilized patterns add a sense of depth and narrative to exterior walls, inviting light to play across their intricate details and creating surfaces that feel both tactile and alive. In interiors, it acts as a subtle statement piece for feature walls, spa-inspired spaces, or boutique hospitality projects, where its fossil markings evoke a connection to the earth and the passage of time.

Dune S

Defined by its fine, horizontal striations, Dune introduces a sense of calm order and spatial continuity to architectural designs. The thin, stacked profile creates a delicate interplay of shadow and light, giving walls a refined texture without overpowering the overall composition. Its minimalist geometry lends itself perfectly to contemporary projects where clean lines and subtle materiality are key. Dune works especially well in linear architectural forms, helping to elongate facades and interiors visually. In exterior applications, it brings a modern, almost monolithic elegance, while indoors it can be used to create serene, tactile backdrops for living spaces, lobbies, or retail environments.

Delos S

Inspired by the mosaics found in the excavations in Delos Island, one of the most important mythological, historical and archeological sites in Greece, we created Mathios Stone Delos texture.
Delos is defined by its embossed rectangular pieces, arranged in a pattern that creates a strong geometric rhythm across any surface. The precise lines and subtle depth of its texture introduce visual structure while maintaining a sense of harmony and flow. Delos is particularly suited to contemporary architectural concepts where designers seek to add order and refinement to walls without overwhelming the space. Its geometry allows it to complement both minimalist and layered material palettes, making it ideal for sleek exterior facades or sophisticated interior feature walls.

Mathios Bricks

Whether you're a connoisseur of time-worn aesthetics or a devoted industrial design aficionado, the world of brick offers an abundance of opportunities to craft a distinctive architectural fusion. Bricks, with their enduring charm and versatile nature, serve as the canvas upon which you can paint the story of a space, blending tradition with innovation.

From rustic red bricks reminiscent of a bygone era to sleek, minimalist gray bricks that evoke an urban, contemporary vibe, your choice of bricks can set the tone for your architectural masterpiece. The possibilities are endless, and the design journey is an exciting one, as you explore the myriad textures, colors, and patterns that bricks can offer.

Masterbrick S

Mathios Stone Masterbrick collection is the definition of brick profile. With slightly squared edges and time worn color nuances, it can complement the whole building façade or achieve industrial interior design. A rich color palette that satisfies even the most demanding taste. Combine with Mathios Grout various options and create a unique design blend.

Kerabrick S

The Kerabrick line was developed for those who prefer simple applications without compromising quality. The color combinations offer unique warmth in the environment and at the same time cover the design recommendations of every architectural creation. Kerabrick is the ideal solution for covering internal and external areas while combining esthetics, quality and technology.
The durability in high pollution environments, in extreme weather conditions, the water absorption, and the stability of its natural and chemical characteristics are only some of its characteristics.

MATHIOSstone®

Pavers Estate

With gently rounded corners and a smooth, refined surface, Mathios Stone Estate Pavers reinterpret the timeless charm of traditional cobblestones for contemporary design. The collection's four nuanced color tones offer flexibility, allowing it to complement both classic landscapes and modern outdoor spaces. Estate Pavers are ideal for creating warm, inviting pathways, courtyards, and patios where rustic character meets clean, structured lines. Their subtle texture adds visual interest while maintaining a sense of order and sophistication, making them equally suited for residential gardens, urban plazas, or boutique hospitality projects.

Pavers Country Club

Inspired by the elegant outdoor spaces of exclusive country clubs, this collection evokes a sense of understated luxury and refinement. The elongated, brick-like format allows for creative freedom in design—whether arranged in classic horizontal or vertical patterns, dynamic diagonals, or sophisticated herringbone layouts. Country Club Pavers are particularly suited to architectural projects where paving must do more than cover ground; they can define spaces, guide movement, and add subtle texture to courtyards, terraces, and walkways. Their scale and clean edges make them equally appropriate for grand entrances, boutique hospitality landscapes, and private gardens where a blend of tradition and modernity is desired.

Pavers

Forest Whisper

Have you dreamt of a great alley with tree trunks for your garden? Now you can have it! Discover Forest Whisper, the new paver collection. It resembles trunk trees, but it is robust and weather resilient like Mathios Stone. Enjoy the flexibility of placing Forest Whisper pavers directly on the ground without bothering about cutting, grinding, or putting any special coating such as it would have been required in the case of the wood. Forest Whisper is available in two dimensions for even more natural but not less impressive result. Escape from the ordinary and refresh your garden by creating a fairytale path.

Accessories

Stone accessories such as wall caps, column caps, trim pieces, and hearthstones are indispensable elements in enhancing the beauty and performance of stone installations across various applications. Whether used in outdoor landscaping projects to accentuate garden walls and pathways, in exterior design to adorn building facades and entrances, or in interior design to embellish fireplaces and accent walls, these stone accessories play a vital role in elevating the overall quality and longevity of stone installations.

Column Cap

Column caps are architectural elements designed to provide a finishing touch to the top of columns or pillars. They serve both aesthetic and practical purposes, enhancing the appearance of the column while also protecting it from weathering and damage. Column caps can be produced in various colors to complement the tones of Mathios Stone collection ensuring a seamless integration with the rest of the architectural design.

Water Table

Water tables serve multiple important purposes, combining functionality with aesthetic appeal. They provide essential protection against water damage by helping redirect rainwater away from the building's foundation. Particularly in regions with heavy rainfall or where buildings were susceptible to water damage and moisture, they prevent potential damage caused by water flowing down the walls.
Mathios Stone Water Tables also offer a versatile solution for architectural design. By crafting them in the same color hue as other stone elements, such as walls or trim, they seamlessly integrate into the design, adding visual interest and coherence to the overall appearance.

Accessories
Wall Cap

Wall cap or capstone is a shielding and decorative feature placed on top of a wall. It protects the top of the wall from water penetration, weathering, and other forms of moisture damage. Similar to a water table, a wall cap helps divert rainwater away from the wall's surface. Usually, they are installed at the top of retaining walls, garden walls, parapet walls, or other vertical surfaces. Beyond their practical function, Mathios Stone wall caps are custom-designed to match the specific stone used in the construction of the wall. This ensures that they seamlessly blend with the overall architectural design and enhance the aesthetic appeal of the entire structure.

Accessories
Hearthstone

Hearthstone forms the floor or the hearth of a fireplace. It serves both functional and aesthetic purposes, providing a durable and heat-resistant surface for the fireplace while also enhancing the visual appeal of the hearth area. Hearthstones by Mathios Stone can be crafted in assorted colors to complement various fireplace designs and enhance its appeal while adding charm and warmth to the room.

Accessories
Window Trim Vertical

Vertical window trims are installed around the perimeter of a window, in general on the sides and run vertically from the top to the bottom. They add detail to the exterior of a building and help define the shape of the window creating a polished look.
Window trims also help to seal and protect the edges of the window from moisture, drafts, and other weather-related issues. When they are properly installed, they can help prevent water infiltration and improve energy efficiency. Window trims also provide additional structural support for the window frame and surrounding wall.
Mathios Stone Window Trims are customized to blend with the specific stone used in the construction of the building.

Accessories
Window Trim Horizontal

Horizontal window trims are the architectural elements that frame the top and bottom of a window in a horizontal orientation. Like vertical window trims, they provide structural support to the window and enhance its sealing improving energy efficiency. Mathos Stone Window Trims are specifically designed to seamlessly integrate with the overall stone design of the building.

Complementary Products

EXTRASTONEGLUE

Extra Stone Glue.
The Right Adhesive for your Project.

Before starting your stonework it is important to select the correct bedding adhesive to ensure efficient stone bond and high performance. Extra Stone Glue is a Special Acrylic heavy duty elastic adhesive especially composed for manufactured stone veneers & brick slips. It has high adhesive strength and is applicable on internal and external surfaces.

Additionally, its high durability to extreme temperature conditions (humid, heat or frost) make Extra Stone Glue the ideal choice regardless of the location and the installation surface.

It is categorized as C2TES1 type according to EN 12002

MATPROTECT

Mat Protect Plus.
Protect your stonework

Mat Protect is a silicon varnish protective treatment that safeguards the beauty of architectural stone veneer.

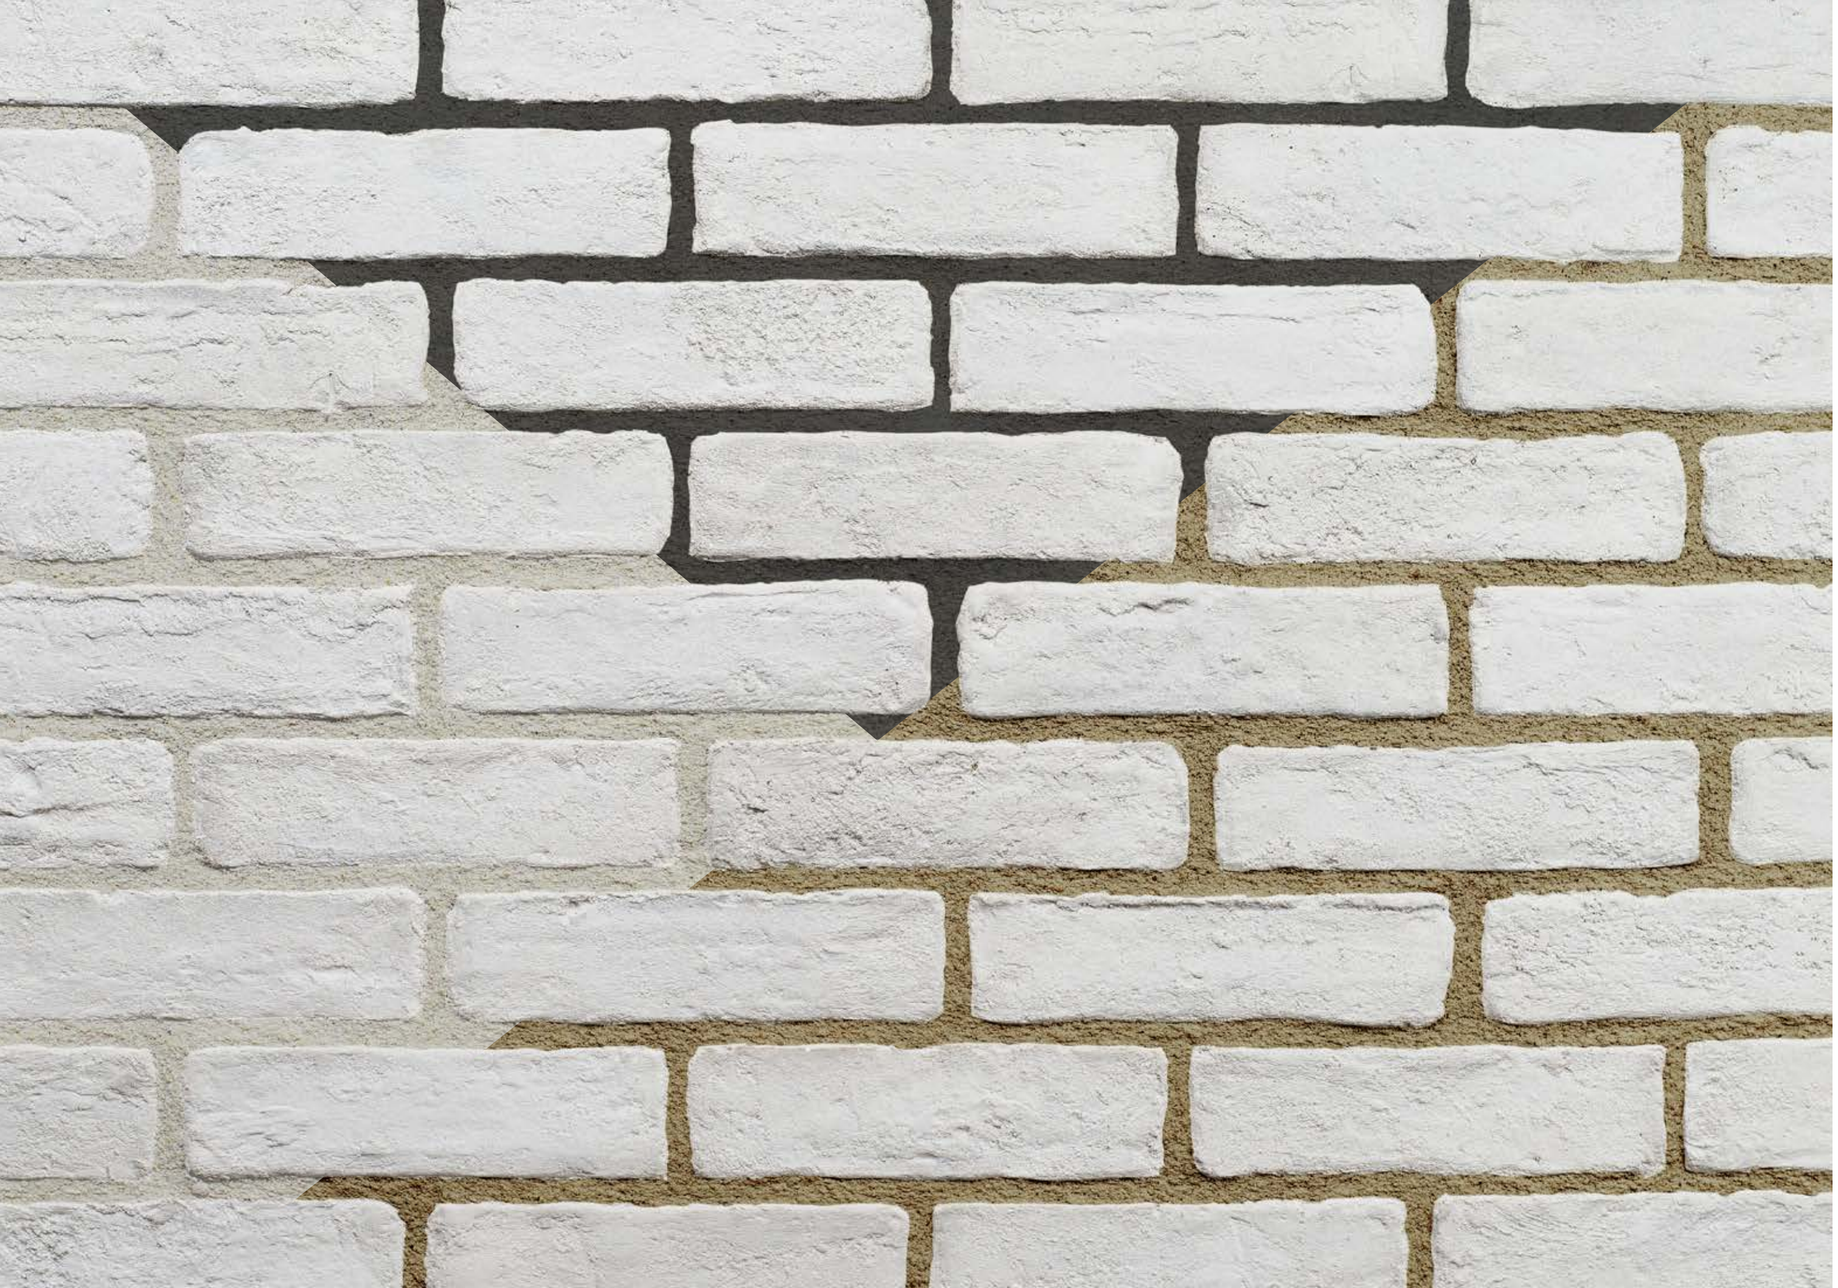
Designed to provide a highly effective ability to resist penetration by water, it is a colorless waterproofing treatment for exterior and interior, ready to be applied without any dilution, over the stones.

Due to its composition, it provides lower porosity which results in anti-freezing protection and tolerance in chlorine water. Mat Protect is recommended for buildings, water pools, floors, walls, and walkways close to the seaside and exposed to chlorine water and sea-spray.

MATFIX 50

Mat Fix 50.
Super Flex Acrylic Power

MATFIX 50 is an elastic adhesive used for adhesion of tiles, natural/handmade stones, vitreous mosaics, clinker, porcelainized gres on highly demanded surfaces. It is applied on internal and external surfaces.



MATHIOS Grout®

Create your own stonework with Mathios Grout, the ideal choice for Natural & Architectural Stone. Produced by high quality cement, new generation aggregates and reinforcing additives, Mathios Grout provides high mechanical strength and excellent workability. It is fully waterproof and easy to clean.

It offers possibility of filling joints from 10mm to 50mm and is suitable for application to both internal and external surfaces. It is available in 13 color shades, indelible in time and in two grain sizes. Combine them with the grout style you wish and see how you can recast your stone.

Picking your grout technique according to what you're trying to achieve is as important as selecting the stone.

Scan to view more about Mathios Grout

Standard grouting style

The most common technique is to lay each stone one finger width apart from each other and grout between each stone. The grout is deeper than the face of the stone and exposes the stone edges. If the grout color pairs with the hues of the stone, this makes mostly the stone stand out. For contrasting design result pick up a bold color grout opposite of the stone color.

Overgrout style

The mortar overfills the joints and overlaps the face of the stone. A very popular technique to achieve a rustic and authentic old-world look. It gives such a realistic result to the construction that it's hard to believe it's not centuries ago built. Ideal for irregular shaped stones and brickslips. It would also fit nice in an industrial design loft.

Flat with the stone face grout style

The grout level is almost flat with the face of the stone. Similar to the standard grouting style but with more active role on the final design. Try to use different color grout and see how your stonework transforms. For a discreet and always in style look match the grout color with the dominant color shadings of the architectural stone. On the contrary, if you love impactful effect, select grout color opposite of the stone color. With light stone, use dark grout, and with dark stone use light grout.

MATHIOS REFRACTORIES S.A.

30 YEAR LIMITED warranty

Mathios Refractories S.A. warrants that for a period of 30 years from the date of the original purchase, its products will be free from defects in material, shape, color and workmanship, provided that they are used on structures conforming to the regulations being locally in force and that they are assembled into structures in conformity with the Mathios Refractories instructions.

For a valid 30 years limited warranty please strictly follow the installation instructions provided in each carton box with Mathios stone products or visit our you tube channel for visual material regarding proper installation method.

Mathios Refractories will free of charge repair or as the case may be supply of new products to replace the defective. This warranty is limited to the said repair or supply of new products to replace the defective ones and does not cover any costs, whatsoever, incurred in relation with the assembly of the products into structure, like indicatively labor costs incurred in removal and replacement of defective products. This warranty does not as well cover damage caused by the structure itself or the construction or eventual repair of the building or the other wall movement, contact with chemicals or paint, discoloration due to airborne contaminants, staining or oxidation or foot traffic.

Mathios Refractories is only liable to the original purchase. This warranty cannot be transferred to any subsequent owner.

This written warranty represents the entire warranty agreement between Mathios Refractories and you. This warranty may not be altered in any way other in writing by an officer of Mathios Refractories duly therefore authorized.
