Mathios Grout

Create your own stonework with Mathios Grout, the ideal choice for Natural & Architectural Stone.

Produced by high quality cement, new generation aggregates and reinforcing additives, Mathios Grout provides high mechanical strength and excellent workability. It is fully waterproof and easy to clean.

It offers possibility of filling joints from 10mm to 50mm and is suitable for application to both internal and external surfaces.

It is classified as CG2 WA according to EN 13888.

Unleash your Creativity

Mathios Grout comes in 13 indelible in time colors matching various stones. Choose contrasting colors to emphasize the stones themselves or open up a space with a grout very close in color to your stones.

Available in 2 granulometric sizes, Mathios Grout can create smooth or crude aesthetic result.

Combine your preferred color and grain size with the grout technique you wish and see how you can recast your stone.

Terracotta

Easy to use

Simply add water and stir slowly with stirring until homogenous mixture.

Each bucket contains the exact amount of material for each color, so no bother for weighing and calculating.

Its two hours workability and its rapid setting time facilitate the project delivery time.

Dosage:

Add 1500ml of water ($\pm 10\%$) for each bucket and stir slowly with stirring until homogenous mixture.

For the proper color, the entire content of the bucket should be mixed and not part of it. Blending the contents of a bucket with a mixture of other bucket will affect the color result.

Workability:

2 hours

Setting time:

30 minutes

Storage:

12 months

Consumption:

5-14 kg/m² depending on the grout size.

N.B. The above times have been calculated under normal conditions.

Picking your grout technique according to what you're trying to achieve is as important as selecting the stone.

Standard grouting style

The most common technique is to lay each stone one finger width apart from each other and grout between each stone. The grout is deeper than the face of the stone and exposes the stone edges. If the grout color pairs with the hues of the stone, this makes mostly the stone stand out. For contrasting design result pick up a bold color grout opposite of the stone color.

Flat with the stone face grout style

The grout level is almost flat with the face of the stone. Similar to the standard grouting style but with more active role on the final design. Try to use different color grout and see how your stonework transforms. For a discreet and always in style look match the grout color with the dominant color shadings of the architectural stone. On the contrary, if you love impactful effect, select grout color opposite of the stone color. With light stone, use dark grout, and with dark stone use light grout.

Overgrout style

The mortar overfills the joints and overlaps the face of the stone. A very popular technique to achieve a rustic and authentic old-world look.

It gives such a realistic result to the construction that it's hard to believe it's not centuries ago built. Ideal for irregular shaped stones and brickslips. It would also fit nice in an industrial design loft.

Various applications

Due to its components, Mathios Grout offers possibility of filling joints from 15mm to 50mm and can be applied on both internal and external areas. It is suitable for both wall and floor applications.

Its waterproof properties make it ideal for use in swimming pools, hydrotherapy and spa baths, bathrooms & showers.
